

SNIPER TRAINING SIMULATOR

 **HAVELSAN**

SNIPER TRAINING SIMULATOR

Gain realistic training scenarios, shooting and binoculars experience in a safe and repeatable environment.

TECHNICAL SPECIFICATIONS

- Training range up to 1200 meter
- 3-12x 50 mm binocular instrumentation
- Realistic 3D images
- Real weapon integration
- Special binoculars option
- Micro display and related optics
- Environmental conditions that can be customized controlled and changed
- Scenario based training with game engine
- All kinds of terrain conditions and LOS analysis Real binocular integration
- Standalone design
- Producing and recording scenarios
- Meteorology simulation
- Computer controlled powers

KEY FEATURES

- Safe and controlled environment
- Classroom-based
- Real guns and binoculars
- Creating realistic / adjustable scenarios
- Variable terrain, weather and wind, day and distance conditions
- Distance estimation, ballistic and wind correction training with MiDot or other scopes
- Recoil or non-recoil weapons

SPOTTER

- Spotter functions can be included on demand.
 - Laser Rangefinder
 - Weather Meter
 - Spotter Scope
